Executive Summary

Knight Frank Kenya is a well-established real-estate agency with strong local brand equity and a deep property-market database. The agency scores **71/100** in the overall marketing audit, indicating solid fundamentals but clear opportunities for growth. The biggest strength is the breadth of listings and trusted reputation; the biggest gap is the lack of a fast, mobile-first search experience and missing high-intent content that competitors are ranking for.

Top Three Priority Actions

1	Create comparison pages "Knight Frank Kenya vs [Competitor]" pages — capture bottom-of-funnel traffic for search queries like "HassConsult alternative".
2	Add interactive mobile search Add an interactive, mobile-optimised property-search filter — reduces friction and matches the UX of HassConsult and Lamudi.
3	Publish the Buying Guide Publish a comprehensive "Guide to Buying Property in Kenya (2026)" — fills a high-search-volume content gap and positions the brand as a thought leader.

Implementing these recommendations is estimated to generate **\$3,200 – \$9,500 per month** in incremental revenue based on projected traffic lifts and conversion improvements.
